# Operating Instructions

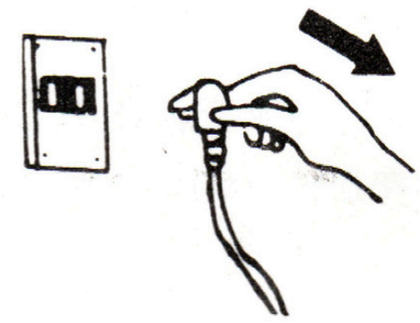
Please read these instructions completely before operating the unit.

Dear Homemaker,

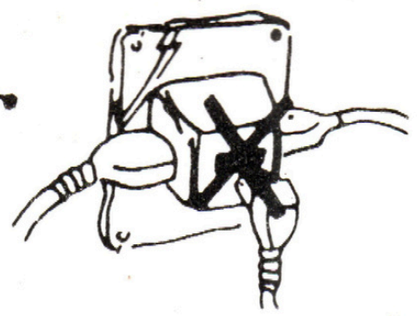
Thank you very much for your purchase of National/Panasonic Electric Iron. With this, we welcome you to the growing family of satisfied National/Panasonic product owners all over the world. We assure you of a perfect package because this product has passed a series of rigid tests under strict quality control standards. This manual will give you the proper guidance you need for using your National/Panasonic Electric Iron.

## CAUTION:

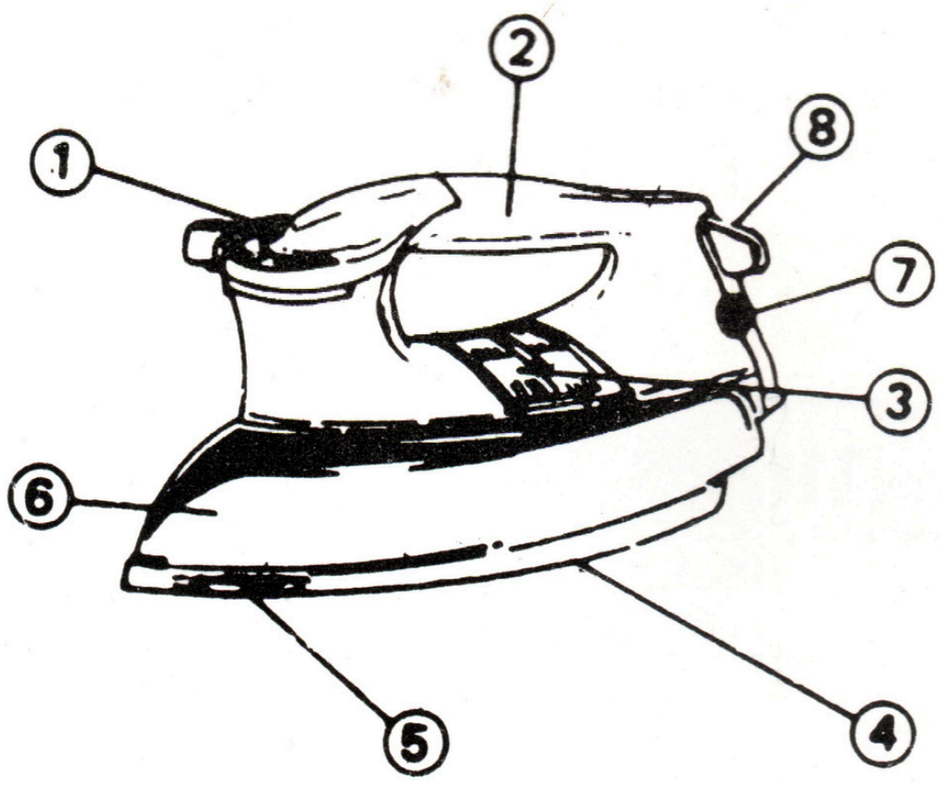
Be sure to unplug Iron after every use.



Do not plug unit to an octopus outlet.

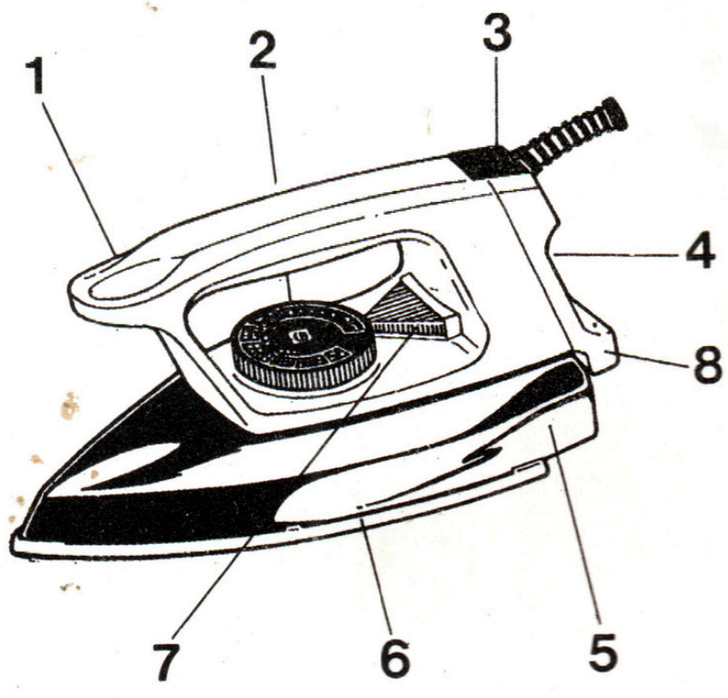


## PARTS IDENTIFICATION



NI-21A

1) Fabric dial
2) Handle
3) Fabric Guide
4) Soleplate
5) Button notch
6) Cover shell
7) Pilot lamp
8) Rear handle cover



NI-312DT/NI-312D/NI-312

1) Handle
2) Fabric guide dial
3) Swivel cord
4) Rear handle cover
5) Cover shell
6) Soleplate
7) Dial pointer
8) Heel rest

## HOW TO USE

1. Set the fabric guide dial at the desired fabric material.

2. Make sure the voltage indicated on the iron meets your local voltage. Allow iron to heat for 2 minutes on heel rest before ironing.

3. The iron automatically switches OFF upon reaching the temperature set on the fabric guide and will remain OFF as the iron keeps the pre-set temperature (for NI 21A models, the pilot lamp tells you whether the iron consumes electricity or not). It switches ON again when the iron decreases from its pre-set temperature corresponding to that set on the fabric guide. This cycle repeats until you finish your ironing to give you savings in electric bills.

4. First, iron chemical synthetic fabric at low temperature, and then, as the temperature rises; iron wool, cotton and linen accordingly. The iron heats more quickly than it cools.

5. Allow time for the iron to heat when changing from a low temperature to a higher one. Conversely, wait a while when changing to cooler setting.

## HOW TO CHANGE THE CORD FOR LEFT HAND IRONING
**(For NI-21A only)**

Take off the rear handle cover by removing the (+) screw. Change the pilot lamp and cord to the opposite side. The cord end should be inserted into V-shaped groove in order to prevent strain on the cord.

| SPECIFICATIONS | | |
|---|---|---|
| Model : | NI-21A | NI-312DT<br>NI-312D NI-312 |
| Voltages : | 220 V | 220 V |
| Power : | 1000 W | 1000 W |
| Weight : | 1.5 kg. | 1 kg |

## SPECIAL FEATURES

FOR NI - 312 DT ELECTRIC IRON TEFLON COATED

1. Easy to clean - Sticky materials can be removed by wiping surface with soft cloth.

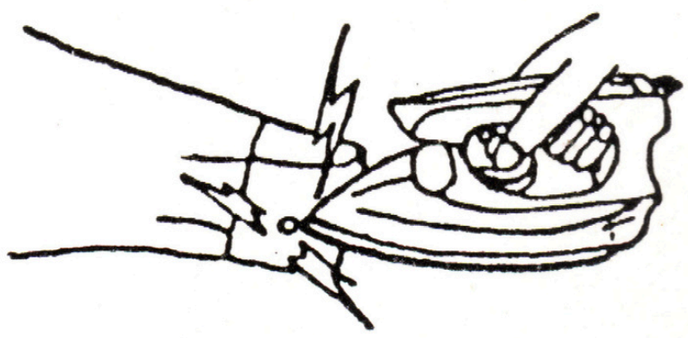
2. Very smooth ironing - Non-stick coating glides smoothly over clothing materials.

3. Water proof - Does not absorb moisture.

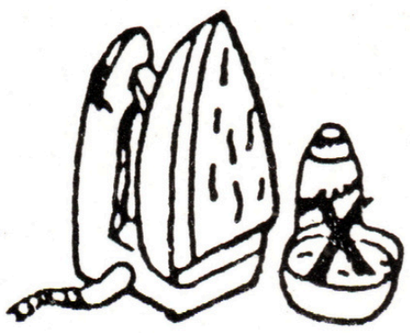
4. Corrosion Resistant - Even oil does not penetrate the non-stick coating

NOTE :
NON-STICK COATING MAY WEAR OFF BUT WILL NOT AFFECT IRONING.

## CORRECT USAGE AND MAINTENANCE



1. To prevent scratches on the non-stick coating surface, do not iron over buttons, zips, hooks or similar hard objects.

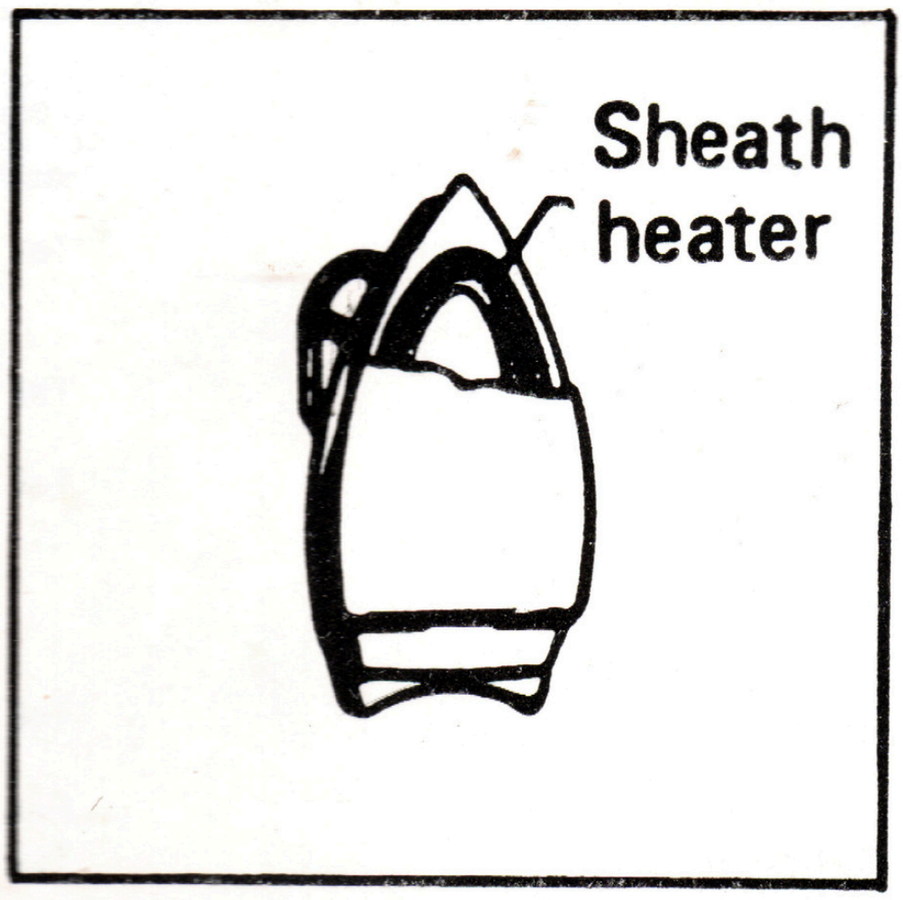


2. Do not use chemicals or abrasive cleaning agents for cleaning the non-stick coating surface.

3. Allow the unit to cool down sufficiently before using a soft cloth to clean the non-stick coating surface.

# WARRANTY

**Three (3) Years Warranty on Sheath Heater**
**One Year Warranty on other parts**
**Lifetime Free Service**



This warranty is non-transferrable and does not apply to damage(s) arising from accident, improper use, use of voltage other than designated, failure to follow operation instructions provided, faulty installation, alteration or tampering by anyone other than a duly authorized service company.

Should you have any service complaints, comments, suggestions or questions please feel free to get in touch with your nearest National/Panasonic service center.

Should you have any service complaints, comments, suggestions or questions, please feel free to get in touch with us.
